

PlantPlan Genetics

PlantPlan Genetics provides genetic evaluation and advisory services in tree and plant improvement.

PlantPlan Genetics advises on species suitability, strategy development, economic breeding objectives, database development, trial design, statistical analysis of trial data, genetic evaluation, selection, mate allocation tactics and deployment strategy.

PlantPlan Genetics provides strategic support for the national tree improvement programs in Australia for *Pinus radiata*, *Eucalyptus globulus* and *E. nitens*.

PlantPlan Genetics is also involved in developing innovative software tools to assist breeders in operational tree improvement activities. The TREEPLAN® system is part of its innovative package.

PlantPlan Genetics works with clients to provide successful commercial outcomes, by providing access to leading edge tools and specialist expertise in genetics.
